No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                      1 gagototggacaaaattgag.......8caagcaaacaaaaaaa 5082

Sequence 15, Application US/08076726

Patent No. 5464758

GENERAL INFORMATION:
APPLICANT: Gossen, Manfred
TITLE OF INVENTION: Tight Control of Gene Expression in
TITLE OF INVENTION: Eucaryotic Cells by Tetracycline-responsive Promoters
NUMBER OF SEQUENCES: 16
CORRESPONDENCE ADDRESS:
ADDRESSEE: Sterne, Kessler, Goldstein & Fox
STREET: 1100 New York Avenue, N.W.
4746 IGAIGIACAGICTGICAIGAACAIGITCCIGAAITCIAITIGCIGGGCITTITITICIC 4805
                                                                                                                                                        4866 TTTGCTTCCCATTGTGGCTCCTATCTGTGTTTTGAATGGTGTTGTATGCCTTTAAATCTG 4925

SEQUENCE CHARACTERISTICS:

ORGANISM: Human cytomegalovirus

Towne (hcmv)

IMMEDIATE SOURCE:

TOPOLOGY: circular MOLECULE TYPE: DNA (genomic) ORIGINAL SOURCE:

6244 base pairs

LENGTH:

TYPE: nucleic acid STRANDEDNESS: double

CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/08/481,970

CLASSIFICATION: 800

FILING DATE:

COMPUTER READABLE FORM:
MEDIUM TYPE: Floppy disk
COMPUTER: IBM PC Compatible
OPERATING SYSTEM: PC-DOS/MSSOFTWARE: ASCII text

Sequence 1, Application US/08629939;
Patent No. 564595;
GENERAL INFORMATION:
APPLICANT: Kieback, Dirk G.
TITLE OF INVENTION: METHODS FOR DIAGNOSING AN INCREASED
TITLE OF INVENTION: RISK OF BREAST OR OVARIAN CANCER;
NUMBER OF SEQUENCES: 14
CORRESPONDENCE ADDRESS:
ADDRESSEE: SIGHRUE, MION, ZINN, MACPEAK & SEAS
STREET: 2100 Pennsylvania Avenue, N.W., Suite 800
CITY: Mashington, D.C.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         COMPUTER: IBM PC compatible

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Sequence 19, Application US/08655241
Patent No. 6025543
GENERAL INFORMATION:
APPLICANT: Yanofsky, Martin F.
APPLICANT: Weigel, Detlef
TITLE OF INVENTION: Seed Plants Exhibiting Early Reproducti
TITLE OF INVENTION: Development and Methods of Making Same
NUMBER OF SEQUENCES: 26
CORRESPONDENCE ADDRESS:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    3: Campbell and Flores
4370 La Jolla Village Drive, Suite 700
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              PatentIn Release #1.0, Version #1.25
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/08/655,241
FILING DATE: 05-UN-1996
CLASSIFICATION: CLASS 800
ATTORNEY/AGENT INFORMATION:
